1. The "Zakłady Wytworzenia Turbin Sztucznych M-51", a factory engaged in the manufacture of electric engines and insulation material, was located on ul. Jana-Sliwki at Gleiwitz. The factory previously belonged to the Henschel firm.
2. Prior to August 1953, condensers, generators, commutators for electric engines, insulation material for high tension installations and radio sets were manufactured at the works. Some of the generators were designed for tanks and the radio sets were probably installed in tanks at Laband (Laband).

Probably the J. Stalin Mechanical Works
have been reported as being required if not
manufactured.
